GRAHAM CHEMICAL CORPORATION

*A New Dimension To Specialty Chemicals.*

Graham Chemical is:  
A manufacturer  
A distributor  
A service provider

## Our Mission

- To be a global manufacturer and distributor of specialty chemicals.
- To provide outstanding technical and customer service that far exceeds our competition.
- To offer reliability, efficiency, flexibility, and the highest quality standards at competitive prices.
- To add value to *our customers'* products through consistent innovation and improvement of *our* products.
- To listen to and understand the needs of our customers, vendors, and employees.
- To work in a successful team environment with our customers, vendors, and employees.

---

## Our Focus

Graham Chemical is a dimensional chemical manufacturing and distribution company. As a superior manufacturer of high-quality specialty chemical intermediates, surfactants, and performance additives, we focus on the food, household, industrial, institutional, personal care, paint and coatings, and pharmaceutical industries. To further complement our product line, we distribute a wide spectrum of aroma chemicals and essential oils, fine ingredients, and industrial and specialty chemicals.

Our committed professional staff has established Graham Chemical's reputation for outstanding technical and customer service. Our desire is to enhance your operation by helping increase performance, improve quality, and fulfill designated business objectives.

We work outside regular channels to source and develop chemicals for your most challenging projects. Whether in the laboratory or in commercial-scale production, Graham Chemical offers comprehensive and custom product development.

Our network of manufacturing facilities located throughout North America provides flexibility, uninterrupted supply, and competitive solutions. Our team of logistic professionals ensures product integrity and on-time delivery through an integrated system of warehouses and transports.

We offer a wide spectrum of aroma chemicals and essential oils, fine ingredients, and industrial and specialty chemicals.

# Our Products

## SURFACTANTS AND PERFORMANCE ADDITIVES

Graham Chemical is a leading manufacturer of surfactants and performance additives. The products in the "PERFORMER" brand line offer many functional benefits to a wide cross-section of applications.

## FOOD

Antifoam Agent • Emulsifier • Food Release Agent

## HOUSEHOLD, INDUSTRIAL, AND INSTITUTIONAL

Antifoam Agent • Corrosion Inhibitor • Coupling Agent • Detergent • Dispersant • Emulsifier • Foam Booster • Foam Stabilizer • Lubricant • Mold Release • Rinse Aid • Shine Enhancer • Water and Oil Repellent • Wetting Agent • Viscosity Builder

## INDUSTRIAL PROCESS WATER

Antifoam Agent • Antiscalant • Metal Precipitant • Microbiocide

## LEATHER AND TEXTILES

Abrasion Resistance • Antifoam Agent • Antistat • Dispersant • Emulsifier • Softening Agent • Water and Oil Repellent • Wetting Agent

## PAINTS AND COATINGS

Abrasion Resistance • Adhesion Promoter • Antifoam Agent • Dispersant • Thickening Agent • Water and Oil Repellent • Wetting Agent

## PERSONAL CARE

Antifoam Agent • Cleansing Agent • Conditioning Agent • Emulsifier • Foam Builder • Foam Stabilizer • Lubricant • Moisturizing Agent • Thickening Agent

## PHARMACEUTICAL

Antifoam Agent • Emulsifier • Lubricant

## PLASTIC AND RUBBER

Antifoam Agent • Antistat • Mold Release • Resin Modifier

Products in the "PERFORMER" brand line offer many benefits to a wide range of applications.

## SPECIALTY CHEMICAL INTERMEDIATES

Antioxidants for plastics, cross-linking agents for adhesives, paints, and coatings, and catalysts for use in the production of resins are just a few examples of complex specialty chemicals in demand worldwide. These chemical building blocks are commonly found in the adhesive, agriculture, ink and pigment, paints and coatings, proprietary solutions for electronics and metal processing, plastics and resins, and pharmaceutical industries. Depending upon your particular needs, we can call upon our extensive import network to provide these products or assist in their design and manufacture.

## FINE INGREDIENTS

When you require high-purity ingredients and processing aids, you can rely on Graham Chemical to fulfill your requirements. The fine ingredient specialists at Graham Chemical have the technical expertise to help you add value to your products via our acidulants, buffering agents, enrichments, and preservatives.

We understand the product specifications and purity requirements of food service companies, from makers of confectionary products to meat processors. We're also attuned to how important purity and mildness is to the manufacture of personal care products and pharmaceuticals.

## AROMA CHEMICALS AND ESSENTIAL OILS

Flavor and fragrance are so much a part of our everyday experience that it's easy to take them for granted. We forget that their sources often lay across a thousand-mile ocean, in the hottest desert, or in the deepest jungle. These important raw materials are not always easy to acquire.

Through strategic worldwide alliances, Graham Chemical offers a variety of natural and synthetic aroma chemicals and essential oils to the flavor and fragrance industries.

Our carefully cultivated relationships with producers and shippers at the source take the risk out of purchasing these aroma chemicals and essential oils in their purest forms. It also guarantees both quality and supply. Our expert technicians test and confirm the purity of every product in state-of-the-art laboratories.

## INDUSTRIAL CHEMICALS

Graham Chemical services many industries requiring industrial raw materials. Among the chemicals we provide are those used in making adhesives and sealants, cleaners and detergents, electronic and metal components, paints and coatings, and water treatment solutions.

These include:

- Carriers and fillers for adhesives, paints, and coatings.
- Chelating agents, oxidizers, and suspensions aids for cleaners and detergents.
- Etchants, pH stabilizers, and strippers for electronic and metal components.
- Clarifiers, flocculants, and reducing agents for water treatment solutions.

# Our Services

## CUSTOM MANUFACTURING

Graham Chemical offers a complete range of services from product development to commercial-scale production. Our manufacturing network includes an extensive portfolio of technologies and top-of-the-line reactors, evaporators, spray dryers, and particle processing equipment. We are available to produce your new complex molecules with our multi-step synthesis. Our sales and technical professionals work side by side with you to understand your process and develop the chemical that meets your specifications and standards.

## WORLDWIDE SUPPLIER NETWORK

Since the production of chemicals touches so many aspects of our lives, it's no wonder that its source materials come from a wide array of countries. Graham Chemical has developed a network of suppliers from around the globe. Each supplier has been chosen for its ability to offer high-quality chemicals at competitive prices without sacrificing turnaround time or technical support. Our global resources include both domestic and international relationships. We will search around the globe for your hard-to-find chemicals.

## PERSONAL SERVICE

Graham Chemical's approach is direct and personal and our turnaround time is excellent. We meet with you to discuss your chemical specifications, make formula recommendations where needed, and then get to work.

Our computer system can monitor the logistics of your shipments, such as where the delivery truck is coming from, when it is scheduled to arrive, and if there are any delays. We can also track each customer's requirements, such as order specifications, delivery hours, and equipment and packaging considerations.

All Graham Chemical shipments are accompanied by Certificates of Analysis. We feature single-lot shipments and record the lot numbers for easy traceability. In addition, we offer safety and handling assistance, and storage and equipment options.

We meet with you to discuss your chemical specifications, and then get to work.

Graham Chemical's approach is direct and personal and our turnaround time is excellent.
